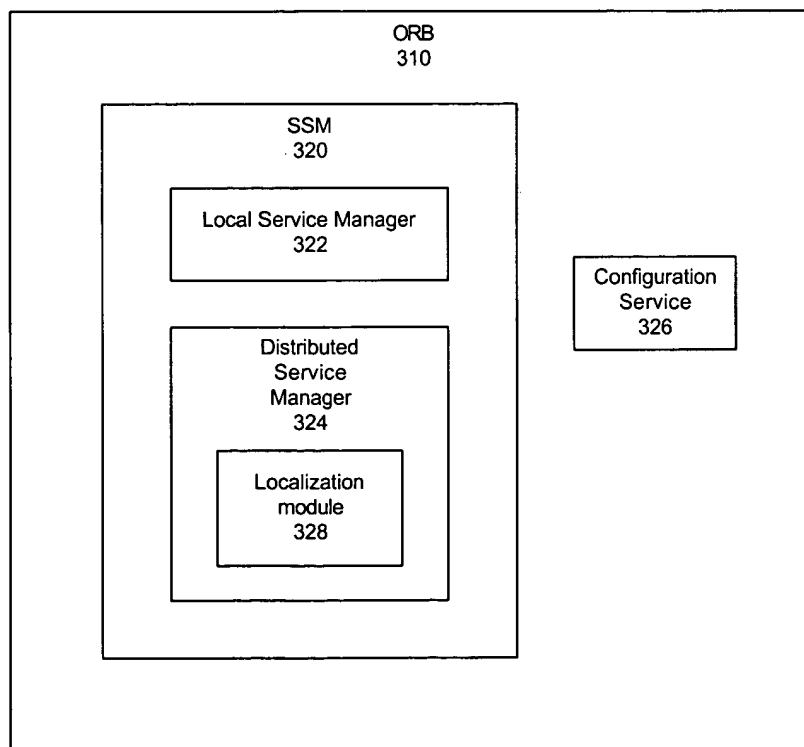

Figure 3

```
graph TD; A([BEGIN]) --> B[Issue call to directory service 410]; B --> C[Receive reference to access manager 412]; C --> D[Issue call to access manager through getService( ) method implemented by LSM 414]; D --> E[Receive reference from LSM 416]; E --> F([END]);
```

The flowchart illustrates the process for receiving a reference from a directory service. It begins with a terminal symbol labeled "BEGIN". An arrow points down to a process box labeled "Issue call to directory service 410". Another arrow points down to a process box labeled "Receive reference to access manager 412". A third arrow points down to a process box labeled "Issue call to access manager through getService( ) method implemented by LSM 414". A fourth arrow points down to a process box labeled "Receive reference from LSM 416". Finally, an arrow points down to a terminal symbol labeled "END".
